Quality Products From the Home of Hospitality

In Canada, hospitality is a tradition. Each year millions of visitors cross Canadian borders to find pleasure in a tremendous variety of vacation areas.

Equipping of the thousands of Canadian hotels and motels is the business of a rapidly expanding and highly competitive industry. With advanced techniques and traditional craftsmanship, Canadian manufacturers are producing to satisfy the specialized requirements of the guest industry in Canada and throughout the world.

At the 49th National Hotel and Motel Exposition in New York City, 16 leading Canadian manufacturers, under the sponsorship of Canada's Department of Trade and Commerce, are exhibiting a representative selection of quality products incorporating new materials and imaginative design.

In the Canadian Exhibit are such diverse products as protective wall coatings for indoor and outdoor use, structural assembly units for space dividers, partitions or convention displays, and a distinguished collection of original oil paintings.

In specialized furniture, Canadian exhibitors have combined the best qualities of wood with those of metals and plastics to produce furnishings ideally suited to the décor and hard-service demands of the institutional field. Comfort, durability and economic maintenance are emphasized in the variety of versatile, storable and sectional furniture.

Space-saving refrigerator cabinets have highly efficient polyurethane foam as insulating material. A range of industrial vacuum cleaners is thoughtfully designed to meet the heavy demands of all phases of hotel, motel and institutional operations. Television receivers, specially designed for hotel use, are in a variety of handsome cabinets, and an exciting series of lighting fixtures and the latest intercommunication and sound equipment are also on display.

These fine products from the home of hospitality are some of the reasons Canadian industry has an international reputation for quality, variety and value.

counter stools, table bases

These counter stools, designed and manufactured by Amco Products (Canada) Limited, are some of more than 35 types produced by the company.

AMCO PRODUCTS (CANADA) LIMITED

**2652 St. Clair Avenue West
Toronto 9, Ontario, Canada**

■ Amco Products (Canada) Limited, supplier to many of Canada's finest hotels, motels and restaurants, is displaying a wide variety of its counter stools and table bases. Amco currently exports hotel equipment to the West Indies, Britain, Ireland and Pakistan.

Superior quality, prompt service and distinctive styling account in part for the increasing demand for Amco products. Amco took over the 30-year-old Gilson line of chairs in January, 1962, and now produces more than 35 different types of counter stools and bases.

Solid steel table bases and counter stools in the company's 1964 line are bright or satin chrome-plated. Counter stools are 20 to 29 inches high with table bases ranging from 22 to 30 inches in height. If requested, Amco will upholster counter stool seats in special fabrics supplied by customers.

Amco offers one-week service from date of order on catalogue articles and two to three-week service on custom-designed products. All Amco designs are created in the Toronto plant.

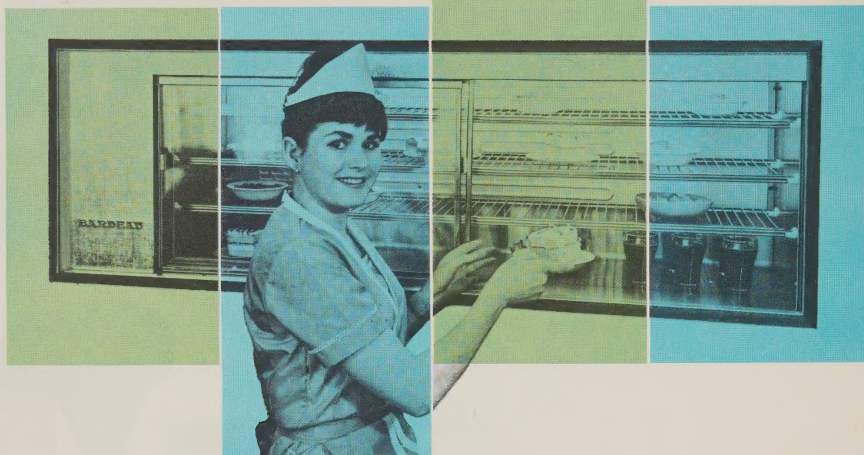

The company also manufactures banquet tables, stacking chairs, coat and hat racks, hors d'oeuvre trolleys and hospital equipment.

refrigerated display cases

The RDC refrigerated display case, one of several dramatic, streamlined pieces shown by Bardeau Ltd. The company manufactures stainless steel food service equipment and is one of the largest companies of its kind in Canada.

BARDEAU LTD.
158 Norfinch Drive
Downsview P.O.
Toronto, Ontario, Canada

■ Use of "foamed-in-place" polyurethane insulation has given Bardeau Ltd. stainless steel food service equipment a dramatic, streamlined appearance impossible with standard insulating materials. The company, one of Canada's largest manufacturers of stainless steel food service equipment for the restaurant, motel and hotel trade, has adapted the new material for its line of refrigerated cases.

Two of Bardeau's frankfurter grills are also on display. Operating on a heated roller principle they produce up to 700 evenly cooked flavor-fresh franks per hour.

A newly designed line of hot food servers is also in the Bardeau exhibit. The hot food servers are versatile units available in two, three and four-drawer models, mobile or stationary. These units were carefully researched and developed and are rapidly becoming the accepted standard for the Canadian market. These units can accommodate full-size standard insert pans 12 by 20

inches up to six inches deep. Each drawer has individual moist or crisp control to keep food at peak-freshness for hours.

Bardeau's display of stainless steel food service equipment reflects a 17-year history of quality and design improvement, and the company is a recognized leader in its field.

wallpapers, full wall murals,
rotogravure wallcoverings

UNIVERSITY OF TORONTO LIBRARY
Reference Department

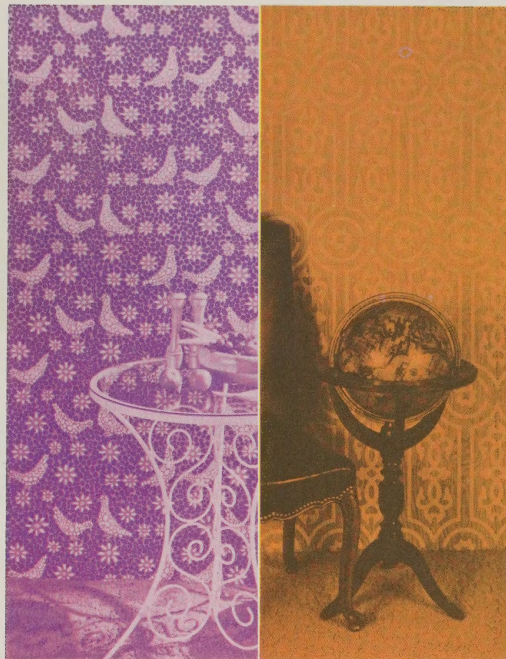

Durable wallpapers printed on rotogravure presses are particularly suited for motels and hotels, restaurants and shops, and an extensive range comes from Canadian Wallpaper Manufacturers Limited. Finer pattern detail and more accurate and interesting reproduction are possible with rotogravure printing.

CANADIAN WALLPAPER MANUFACTURERS LIMITED
222-7th Street
Toronto 14, Ontario, Canada

■ A complete range of moderately priced machine-printed wallpapers, rotogravure wallcoverings and full wall murals is produced by Canadian Wallpaper Manufacturers Limited, one of the largest North American firms in this field.

All Canadian Wallpaper products are plastic coated and washable. Designs and colors range from elegant period décor to casual contemporary styles. Wallpapers are precision trimmed for protection during shipping and handling. This trimming process scores the selvages for easy removal and assures a perfect butt seam. Printed on wet strength stock with approximately five times the normal wet tensile strength, these papers are easily handled during application.

Many of the company's wallpapers are ready-pasted and all Sunworthy full wall murals are pre-treated in this way. Paste, applied during manufacture, greatly simplifies the paper-hanging process for both amateurs and professionals. The paper is applied by simply immersing a pre-cut strip in water, then placing it on the wall.

The rotogravure printing process permits more accurate reproduction for finer pattern detail, more delicate shading and blending of color. Widely diversified colorings range from conservative, realistic effects to the dramatic and flamboyant.

Papers manufactured by Canadian Wallpaper, which was established in 1856, are currently exported to 19 countries.

chairs and stools

Representative of the many beautiful chair and stool designs from Central Store Fixture and Furniture Manufacturing Ltd. is this attractive lounge chair, with swivel pedestal, air foam seat and back, chrome bar stock base with levelers.

CENTRAL STORE FIXTURE AND FURNITURE MANUFACTURING LTD.

**2650 St. Clair Avenue West
Toronto 9, Ontario, Canada**

■ Central Store Fixture and Furniture Manufacturing Ltd. has 23 different models of chairs and stools on display. The company's attractive, smartly designed selection ranges from a one-piece molded walnut stacking chair with tubular steel base to a luxurious lounge chair with a solid walnut frame and removable covers.

Wood frames in Central Store chairs are of one-piece laminated bent-wood construction. They are available in natural, walnut or mahogany finishes. The clean slender lines of the firm's steel chairs provide excellent seating comfort and outstanding durability. They are economical and blend beautifully with the contemporary architecture of modern-day hotels and motels.

Stacking chairs manufactured by these furniture experts combine rugged wear with attractive stylings. Using modern square and round tube frames they are classic examples of experienced construction and functional beauty. These chairs are designed to utilize a minimum amount of floor space and provide maximum seating accommodation for any room.

The company also manufactures an attractive range of bar fixtures, counters, tables, booths and other modern furnishings for the hotel, motel and institutional trade. In addition to catalogue items, Central Store has facilities for the creation of custom work by its own designers or to the individual customer's specifications.

industrial vacuum cleaners

Model ICS Stainless compact vacuum — one of the versatile and reliable models from Corneil Vacuum. The ICS, for wet or dry service will operate efficiently for years with a minimum of maintenance.

CORNEIL VACUUM CO.

**Division of Corneil Vacuum & Appliance Co. Ltd.
305 Roncesvalles Avenue
Toronto 3, Ontario, Canada**

■ A complete range of vacuum cleaners designed to meet all institutional and industrial cleaning requirements is offered by Corneil Vacuum Co. The company's Turbo Vac line includes the Turbo Vac IIS — the first all-Canadian industrial vacuum cleaner. Finished in either baked enamel or stainless steel the range comes in 10, 15 and 20-gallon capacities with a 2½-hp motor, and is built by experts for maintenance-free operation. The stainless steel cleaner handles highly corrosive liquids and solids and the extra heavy construction withstands the roughest handling under the most severe conditions.

Models IC Compact, ICS Stainless and I Enamel feature 1 hp heavy-duty ventilated motors, a water lift maximum of 75 inches, airflow maximum of 100 CFM and treated cotton twill and acid-proof, non-clog corlan filters.

Capacity of the IC Compact and ICS Stainless is 10 gallons. Model I Enamel is recommended where medium duty or dry pick-up are required, and is ideal for institutional and general hotel cleaning requiring about five hours per day running on floor areas up to 15,000 square feet.

The Model IC Compact excels in furnace cleanouts and in hotel and motel rooms, storerooms, bars, locker rooms, offices, warehouses and other locations.

For picking up highly corrosive materials the Model ICS Stainless is especially recommended. Its heavy-gauge stainless steel resists rust and corrosion. It is used by on-the-spot rug cleaners, chemical manufacturers, drug companies, hospitals, and other places where space is limited and weight is a factor.

Corneil Vacuum also displays a convert-a-drum cover #7051 and a special 28-inch power rug brush attachment, allowing three times quicker rug cleaning in halls, and designed to fit any of the company's machines.

institutional furniture

Smart, clean lines of Curtis institutional furniture are combined with flexibility, utility and beauty. Curtis products have wide acceptance in hotels and motels as well as in many other commercial and institutional uses.

CURTIS PRODUCTS LIMITED

495 Ball Street
Cobourg, Ontario, Canada

■ Beauty, utility and versatility in the smartly styled modular series by Curtis Products Limited keynote the entire Curtis institutional line of furniture, ideal for hotels, motels, offices, beauty salons, hospitals and other institutions.

Interchangeable components, a feature of the series, are easily rearranged with a minimum of time and effort. Rugged construction assures years of undiminished appeal and practical use under the most severe conditions. The series includes tables, ottomans, chairs and armrests. Curtis exports to the United States, Britain and the Caribbean area.

Chairs come with laminate topped armrests or fully upholstered club arms. Tables are round, square or rectangular in varied sizes.

The Curtis "L" series features handsome, ruggedly built club chairs and two and three-seaters. They are constructed to withstand uncommonly hard abuse, and maintain their comfort and appearance for years.

Chairs in the 900 series, available in a wide selection of colorful, long-wearing upholsteries, will harmonize with any décor. Seats and backs are comfortably padded. Standard armrests are of selected natural wood. Series

900 tables match the seating units perfectly. Settees are also available in this series.

Used individually or in groups the 900 series units provide relaxing seating for lounge and reception rooms, lobbies and other waiting room areas.

Curtis seating for cafeteria or conference rooms features classic, uncluttered styling. Chairs have foam-padded backs and are easily maintained. Smartly designed conference tables and chairs are skillfully crafted in a variety of shapes and sizes. The Curtis quality line includes a full range of convenience products.

intercommunication equipment, sound systems

The new Electro-Vox master station may originate calls and communicate with any selection of stations in the intercommunication system. It is limited only by the number of selector buttons. This station has 11 buttons, and models having up to 41 buttons are available.

ELECTRO-VOX INTERCOM INC.

**2626 Bates Road
Montreal 26, Quebec, Canada**

■ The Electro-Vox transistorized amplified intercom system, pioneered in Canada 31 years ago, is designed to save time, steps and money. It facilitates paging in hotels and its use in business allows immediate location of personnel, conversation with individuals or groups in any department, room or yard, and easy voice recognition. Electro-Vox is used in hotels, motels, business, industry, churches, schools, hospitals, bowling lanes and military installations.

Housed in an unbreakable steel cabinet, the standard master station occupies only a 7½ by 10-inch desk area and is used to originate calls and communicate with any station or selection of stations in the system. Only the number of selector buttons limits its range. Master stations are available with 2, 6, 11, 21, 31, and 41-button models. They have a universal mounting for wall or desk, but are also supplied in a special housing for flush wall mounting.

The new Electro-Vox fully transistorized intercom system features busy signals, chimes or bells, annunciators, individual volume control, privacy switch, noisy area signaling, paging facilities, automatic reply circuits, central power supply, rugged switches and plug-in com-

ponents. Group conversations, private conversations and remote private answering are all possible.

Authorized distributors throughout the United States, Canada and Mexico install and maintain the systems. Each is covered by an over-all factory guarantee and service warranty for one full year from date of installation. A 10-year low-cost service and parts guarantee policy is available.

exterior, interior coatings

The exterior walls of the beautiful Guggenheim Museum in New York are coated with Betonite, a decorative plastic coating developed by Everguard Coatings. Virtually indestructible, Betonite can be applied to any surface, adapted to any aesthetic requirement.

EVERGUARD COATINGS (INT'L) LTD.

3071 Oakwood Drive

Niagara Falls, Ontario, Canada

■ Tough, textured plastic coatings — Betonite and Ev-Rok — developed by Everguard Coatings (Int'l) Ltd., have gained rapid acceptance in many countries of the world. Virtually indestructible, they combine architectural versatility with functional beauty.

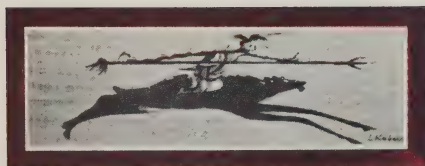

The surface coatings, ten times thicker than paint, become an integral part of the material to which they are easily applied and are equally effective on old or new wood, masonry, metal, hardboard, plaster and stucco. They convert the most inexpensive material into a permanently beautiful, maintenance-free surface. Coatings are vinyl-acrylic-silicone blends with specially selected inert additives. A wide variety of mottled and decorator color effects are possible.

Ev-Rok's impermeability to liquids, ease of maintenance and washability make it particularly suitable for high humidity areas such as showers and steam baths. It is highly resistant to physical abuse, fumes, grease, acids and alkalis.

Betonite is for exterior walls. While water repellent,

it has a high moisture vapor permeability. It is a chemically inert water emulsion containing no fatty acids and the problem of delamination because of acid-alkali reaction (saponification) between the surface and the coating is eliminated. It may be applied over wet or chalking material and its excellent hiding quality makes it suitable for use over porous and other imperfect surfaces.

oil paintings

A variety of beautiful hand-done oil paintings from Kovac Art Creations Limited. Original designs on Irish linen or canvas are tastefully framed to bring beauty to any room.

KOVAC ART CREATIONS LIMITED

3121 - 36th Street
Montreal 38, Quebec, Canada

■ Hand-done oil paintings in a variety of subjects with appeal for every taste are displayed by Kovac Art Creations Limited.

Superb original designs in the Kovac range include scenic sea and serene landscapes, exciting Mexican fiestas, and postured animals. Color — delicately muted on Irish linen, lively and vibrant on canvas — is artistically blended and the paintings are tastefully framed to enhance the mood of any room setting.

A relatively young company, Kovac Art Creations has produced several successful hotel and motel collections and a recent one, the new Airport Hilton hotel in Montreal, has two Kovac pictures in every room. Designs were specifically initiated after special study and consultation with hotel personnel.

Kovac pictures are marketed in a wide range of sizes — 8" x 18" in vertical frames; 16" x 48", 16" x 32" in horizontal frames; 12" x 24", 12" x 36", 18" x 28", 24" x 36" in both horizontal and vertical frames.

Frames vary according to the painting, from plain enameled wood for a peaceful landscape to more ornate framing for colorful and dramatic paintings.

metal and plastic chairs

There's a Spanish influence in the styling of this beautiful chair of metal and plastic from Liberty Ornamental Iron Limited. An artistic blending of traditional design with modern materials and techniques is typical of this company's creations.

LIBERTY ORNAMENTAL IRON LIMITED

**70 Lightbourne Avenue
Toronto 3, Ontario, Canada**

■ Liberty Ornamental Iron Limited, specialists in quality design, manufactures tables and chairs of metal, wood and plastic for restaurant, dining room and dinette use. Chair stylings range from sleek, smooth contemporary design to the gently curved lines of French Provincial and elegant Spanish severity. Although the European influence predominates, Liberty Ornamental produces Colonial and functional modern chair stylings with similar success.

The company also manufactures gracefully styled metal dinette sets, long popular in kitchens of apartment-hotels and motels, and now used increasingly in more formal dining areas. Of particular interest is the blending of wood and metal, with washable vinyl upholstering material and stain-resisting laminates of special durability.

Liberty was a pioneer in developing metal furniture in Canada and is a leader in this specialized field. The company exports to Britain, Australia, the West Indies and the United States.

lighting fixtures

Attractive lighting fixtures by Lumiart Limited add an accent of elegance to the décor of some of the world's finest hotels.

LUMIART LIMITED

704 Notre Dame Street West
Montreal, Quebec, Canada

■ Destined to stand the test of time, fixtures from Lumiart Limited provide light with elegance and grace. Traditional chandeliers, superbly reproduced, are among the company's many products on display. Using designs from outstanding periods of the past, Lumiart's skilled artisans craft distinguished pieces that accent the décor of any modern hotel.

Lumiart's extensive line of fixture styles includes some with a European flavor and others ranging from period and antique reproductions to contemporary. Materials vary from wrought iron and brass castings to aluminum. Special designs are made to order, primarily for hotel, motel, institutional and church use. These are designed by the firm or made to specifications of architects or interior decorators. Other company products include large crystal chandeliers — 10 feet in diameter — finished in a special process that prevents tarnishing, and modern aluminum units — 17 feet in diameter — as well as decorative luminous ceilings and dividers.

The company's metal ceiling and wall grills are available in a variety of designs and finishes and can be used with either fluorescent or incandescent lights.

Lumiart Limited was founded in 1955, and now supplies some of the finest hotels, motels, and restaurants in Canada, the United States, Britain and Puerto Rico with quality lighting fixtures.

desks, structural assembly units

Attractively designed modular office desks are one of many versatile units from Octopus Products Ltd. This desk can be easily dismantled and reassembled and uses a handsome combination of walnut and aluminum.

OCTOPUS PRODUCTS LTD.

**200 Geary Avenue
Toronto 4, Ontario, Canada**

■ Attractively designed desks of walnut and aluminum are displayed by Octopus Products Ltd. with other of the company's structural assembly units. Octopus desks can be assembled or dismantled rapidly and easily — an important factor when storing or shipping. Supporting decorative aluminum sections are made of Series 300 extrusion and corners are locked with specially developed corner brackets.

Versatility and easy installation are key features of this Canadian-designed structural assembly system, which is used for construction of storage, exhibition or display units; room dividers, bookshelves, partitions, screens and many other applications. The system uses an ingeniously designed Threadon rectangular pole — an aluminum extrusion with ¼-inch #20 pitch bolt-thread serrations in recessed channels extending its full length on all four sides.

Attachments of wood, glass, plastic or metal can be secured to the pole at any height with standard ¼-inch #20 bolts screwed into the serrated channels. The only tool needed for installation is a screw driver. Threadon poles can be bolted to walls, used free-standing or

braced against floor and ceiling with spring-loaded tensioners or threaded jacks. The system can be extended by additional poles and components.

Threadon poles are 1½-inch square, come in a variety of anodized colors and wood veneer finishes and are available in standard lengths of 93, 105, 117, and 129 inches.

The company produces three other modular systems, one of them using specially designed Octopus hubs or connectors, permitting extensions in any direction. Octogrilles and Octoscreens — decorative interior or exterior partitions for lobbies, rooms, entrances and facades — are also on display.

custom-built television receivers

RCA Victor combination TV-radio receivers, for hotel and motel use, can be used as table and floor models or built into the furniture. Sets are custom-built to harmonize with room furnishings.

RCA VICTOR COMPANY, LTD.

**1001 Lenoir Street
Montreal 30, Quebec, Canada**

■ For more than 60 years, RCA Victor has been synonymous with the best in Canadian home-entertainment equipment. Now the company's wide diversification of electronic products and services has been skillfully harnessed to provide hotel and motel operators with the best in commercial television.

RCA Victor's commercial television units are designed specially for commercial use. They are custom-built to meet specific needs and are not simply adapted from consumer lines. The units feature such innovations as special antenna-impedance input connections, wired remote-controlled units and background music. The stain-resistant Arborite cabinets are available in a variety of colors. These are only a few of the features RCA Victor provides for complete flexibility in commercial television performance.

In addition to its leading position in the Canadian electronics field, RCA Victor's "single-source satisfaction" policy of sets, system and service — all from one manufacturer — has resulted in more than 75 per cent of Canada's leading hotels and motels featuring RCA Victor commercial television.

chairs

One of the attractive series of functional chairs designed by Lydia Ferrabee for Roxton Mill and Chair Limited. They combine durability with classic appeal.

ROXTON MILL AND CHAIR LIMITED Waterloo, Quebec, Canada

■ Functional chairs, part of a series designed by Lydia Ferrabee highlight the Roxton Mill and Chair Limited display. This line includes a matching side chair and is stocked in black, red or natural finish, with a variety of upholstery styles and colors.

Roxton produces an extensive range of chair and other furniture models in a diversified operation which allows economical manufacture of custom-designed units, and the company is a leader in the contract furnishing field. Hilton Hotels International chose Roxton furnishings for the recently opened Airport Hilton hotel in Montreal. The company also created authentic reproductions for the Palace Grand Theatre in the Canadian Government's Yukon Centennial.

Roxton also manufactures the most complete collection of Colonial furniture in Canada. The entire range is designed in solid eastern hard maple and finished with a modern synthetic varnish impervious to most everyday hazards.

Established more than 74 years ago, Roxton Mill and Chair is one of the oldest chair manufacturers in Canada. Opening of its new plant has more than doubled the company's capacity and versatility. These additional facilities and the skill of Roxton craftsmen assure the firm's customers superb furnishings in the Roxton tradition of quality.

stacking chairs

Attractive lightweight Model 68 plastic stacking chairs manufactured by Standard Tube and T. I. Limited are easily carried, compactly stored. Newly designed curved edges give chairs an upholstered effect.

STANDARD TUBE AND T. I. LIMITED

P.O. Box 206

Woodstock, Ontario, Canada

■ Specialists for more than 25 years in the manufacture of stacking furniture, Standard Tube and T. I. Limited is featuring Model 58 plywood and Model 68 plastic stacking chairs. Both popular models stress comfort, durability and modern styling. The chairs have sturdy steel tube frames with snag-free brazed joints. They are finished in beige baked enamel and plastic floor glides are included.

The compression model reinforced plastic seat and back of the Model 68 is designed specifically for stacking chair use. Material is rigid, entirely static free and attractive curved edges give an upholstered effect.

Model 58 seats and backs are first-quality Canadian birch and maple plywood, electronically bonded and finished in natural-toned synthetic varnish.

Stocks of these chairs are readily available from the company's warehouse in Allentown, Pa.

Warehouses and sales offices are in Montreal, Ottawa, Hamilton, Winnipeg, Toronto and Vancouver in Canada, and in Allentown.

In addition to finished equipment, Standard Tube manufactures welded steel tubing in a wide range of sizes and shapes, up to 5 3/4" diameter, for Canadian industry and export markets.

Unlike folding chairs, the Standard Tube stacking chairs have no hinges to stick, wear out or catch

clothing. The Model 58 can be stacked 16 high in a space 18" x 41" x 53 1/2" high and Model 68 chairs can be stacked 15 high in a space 19" x 40" x 53" high. Up to 400 stacking chairs can be stored in an area 10' x 12'. Stacks, easily moved on simple carts, provide maximum speed in setting-up and clearing any temporary seating requirement.

Standard Tube and T. I. Limited's plant occupies 300,000 square feet and employs 525 people.

nesting furniture

Lightweight Plasteel chairs manufactured by I. Wagner Co. Ltd. are easily stacked and stored. Each chair weighs only seven pounds. Thirty or more can be stacked in this manner and easily transported on a dolly.

I. WAGNER CO. LTD.
130 Bentworth Avenue
Toronto 19, Ontario, Canada

■ A high-density linear polyethylene incorporating strength, flexibility and durability is used in the Plasteel chair manufactured by I. Wagner Co. Ltd. This material, forming the chair's back and seat, will not chip or crack and is as durable as its steel frame. An elegant leather grain finish is molded into the plastic in this attractively designed space-saving unit. Chairs weigh only seven pounds each and can be stacked in right-side-up piles of 15 or up-side-down piles of more than 30. Steel frames are $\frac{7}{8}$ " heavy-gauge tubing, electrically welded into one unit.

Stylish, comfortable and lightweight, No. 300 stacking chairs are available in four graded sizes — 12", 14", 16" and 18" seat heights — to accommodate age groups from kindergarten to adults. Seats and backs are of $\frac{1}{4}$ " hard varnished veneer plywood, with a steel frame similar to the Plasteel series.

The No. 200 Oxford stacking chair has an unusual sled-type design with Posture-Right frame of electrically welded $\frac{3}{4}$ " steel tubing. Seats and backs are of curved plywood finished with wear-resistant varnish.

A complete line of nesting tables — Oxford Nestables — is also manufactured in standard sizes of 30" x 30", 30" x 48" and 30" x 60". They are ideal for banquets and similar applications.

Oxford table extensions, with all-welded steel frames, extend table top area when attached to the nesting tables. Extensions are joined to the nesting table by two wingnuts on each side to form a long, flush table. Standard size of extension tops is 30" x 96".

Folding tables and storage dollies complete the Wagner exhibit. Established 15 years ago, the company occupies a 25,000-square-foot area with manufacturing capacity of 150,000 chairs per year.
